

Embed Widgets in External Sites

Last Modified on 04/09/2018 1:28 pm EDT

You can now embed DevResults dashboard widgets (such as your Activity Map) in external websites. To do so, log in to your DevResults site and go to the Dashboard tab.

In the upper left corner of the map widget, click on the gear icon.

This will open a pop-up window where you can choose to configure the widget differently if you'd like:

Dashboard Activities Results Calendar Documents Photos Adm

CUSTOMIZE WIDGET

Title Activity Map

Color

Base Map Light Gray ▼

Borders ☒ None
☐ World
☐ Countries

Markers ☒ Show Markers

 Embed widget on your site  Done

Once you are done making changes, click on the **Embed this widget on your site** button:

 Fictitious Organization
Sample Development Program

Color

Base Map Light Gray ▼

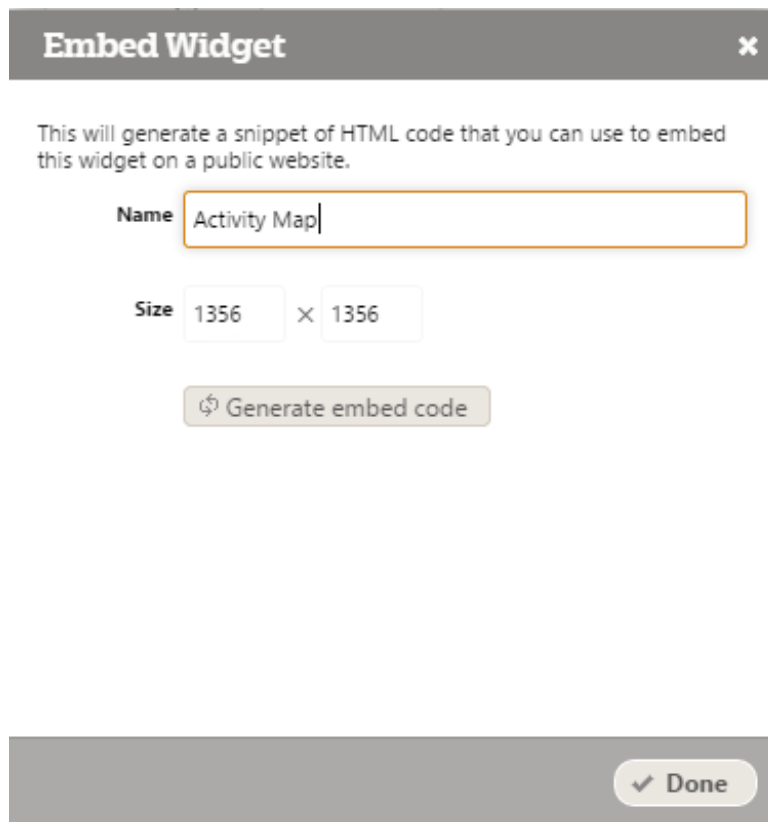

Borders ☐ None
☐ Guinea
☐ Regions
☐ Prefectures
☐ Sub-prefectures

Layers ☐ INVEST_toolkits_Feb11

Markers ☒ Show Markers

 Embed widget on your site   Done

This will open the Embed Widget Pop-up. You can enter a Name (title) and adjust the Size (width, then height).

The image shows a pop-up window titled "Embed Widget" with a close button (X) in the top right corner. Inside the window, there is a text instruction: "This will generate a snippet of HTML code that you can use to embed this widget on a public website." Below this, there is a "Name" label followed by a text input field containing "Activity Map". Underneath the name field, there is a "Size" label followed by two input fields: the first contains "1356" and the second contains "1356", separated by an "x" symbol. Below the size fields is a button with a code icon and the text "Generate embed code". At the bottom right of the pop-up, there is a "Done" button with a checkmark icon.

Once you're done making changes, click the **Generate embed code** button:

Embed Widget

×

This will generate a snippet of HTML code that you can use to embed this widget on a public website.

Name

Embedded Map

Size

930

×

420

Generate embed code

✓ Done

This will display a box that says **Copy this code**. Copy and paste the generated embed code into the html of the webpage that you want the widget to appear on.
