

# Why is there Nowhere to Enter Data on the Results Page?

Last Modified on 06/29/2017 2:18 pm EDT

## The Problem:

You are trying to enter or edit data on an indicator's **Targets & Data** tab -- but under the "Results" section, there are no rows in which to enter data:

DevResults | Kate's World  
Kate's Test Site

Quick search...

Dashboard Activities **Results** Calendar Documents Photos Administration

Home > Results > Indicators > # of new users trained

**1.2a # of new users trained**

Definition **Targets & Data** Reports Forms Documents

Show results for ABC Test Activity

**Targets**

Targets are not cumulative. The first target is the baseline.

Date	Activity Target #	Activity Actual	Actual % of Target
<a href="#">Click to add...</a>			

**Results**

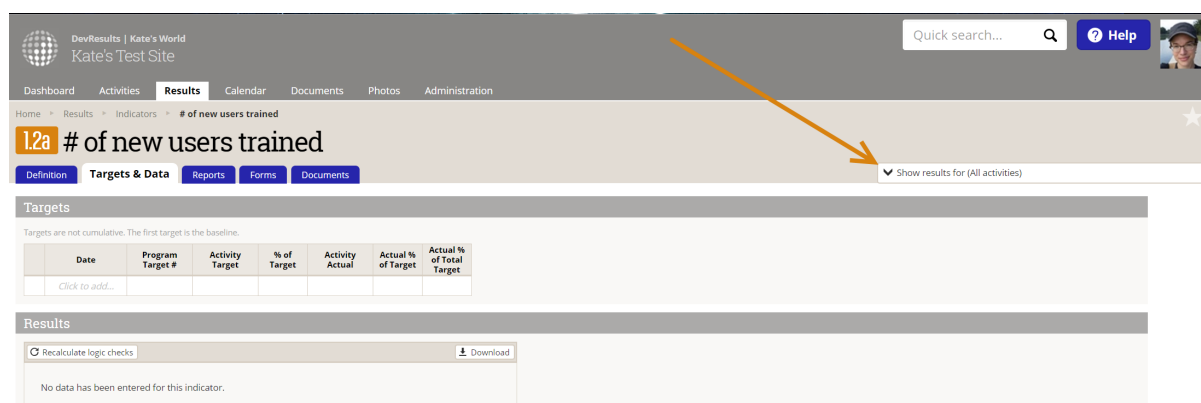

☐ Recalculate logic checks

Reporting Period: 2016 Q1 (Mar 2016)

Location	Gender			Total	Comment
	Female	Male	Unknown		

First, if this indicator is reported on by one or more activities, make sure that you select that activity from the **Show results for** drop-down.

You cannot enter indicator results for the whole program if results are attributed to specific activities.

Home > Results > Indicators > # of new users trained

**1.2a # of new users trained**

Definition **Targets & Data** Reports Forms Documents

Show results for (All activities)

**Targets**

Targets are not cumulative. The first target is the baseline.

Date	Program Target #	Activity Target	% of Target	Activity Actual	Actual % of Target	Actual % of Total Target
<a href="#">Click to add...</a>						

**Results**

☐ Recalculate logic checks [Download](#)

No data has been entered for this indicator.

If you still see no rows in which to report indicator results, here's some background information necessary for understanding this problem:

All indicators are defined with a specific geographic disaggregation, or what we call a **Reporting Level**. There are two types of reporting levels:

1) **Locations** are identified by a set of coordinates and include places like cities, villages,

farms, schools, and hospitals.

2) **Administrative Divisions** are associated with a shape file that denotes an area on a map and include places like regions, districts, provinces, prefectures, or the whole country.

Data Source

Data Source

☒ Enter indicator results directly
☐ Calculate from a formula
☐ Populate from a data table

Characteristics

Indicator Type

☒ Sum
☐ Average
☐ Yes/No

Number format

☒ Whole number
☐ Decimal
☐ Percentage
☐ Rate per

Default Reporting Cycle

Quarterly

Edit reporting cycles

Unit

Individuals

Edit standard units

Periods

Results are:

☒ Incremental (since last result)

Targets are:

☒ Incremental (since last target)
☐ Cumulative (over the life of the project)

Disaggregation

Disaggregations

	Disaggregation	Values	Disable
	Classification	Consultant, M&E, Other, Program Staff	<input type="checkbox"/>
	Gender	Female, Male, Unknown	<input type="checkbox"/>

+ Add a disaggregation...
Master list of disaggregations

☒ Results are cross-disaggregated
☐ Results are parallel disaggregated

Reporting Level

Results are reported by:

☒ Location
☐ Commune
☐ Canton
☐ Entity
☐ Bosnia and Herzegovina

Activities

Is this indicator reported on by specific activities?

☒ Results are reported separately for each activity
☐ Targets are set separately for each activity

Activity	Reporting Cycle
Test Activity	Quarterly

+ Add an activity...
Allow reporting cycles to vary over time

If your indicator is defined with a **Location** reporting level, then the rows for your reporting page should be locations.

If your indicator is defined with an **Administrative Division** reporting level (such as a district, province, department, governorate, etc.), then the rows for your reporting should be regions, *etc.*

If your indicator is not disaggregated geographically (i.e. Indicator results are associated with the whole country) then the reporting level should be the country's name.

Finally, the problem:

If your Targets & Data page has no rows for data entry, the most common problem is that this activity is not matched to any locations, regions, *etc.* (or the whole country).

The managers of this site will then need to:

- **Assign a Geography to an Activity**
