Assign an Indicator to an Activity
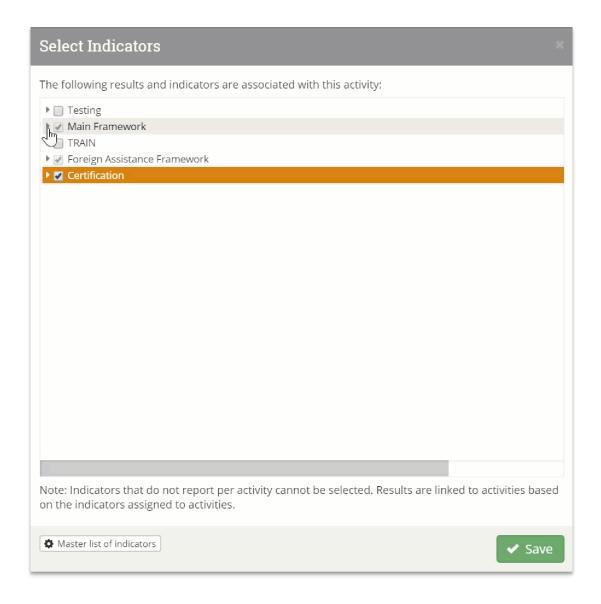

For an activity to report on an indicator in DevResults, the indicator must be assigned to that activity.

First, go to the **Activities** tab of the main menu, select your activity, and the go to that activity's **Overview** tab.

Scroll down to the "Classification" section and click on "Select indicators".

On the popup window that appears, expand the results framework(s) by clicking on the right-pointing triangles.

Select Indicators

The following results and indicators are associated with this activity:

- ▶ ☐ Testing
- ▶ ☑ Main Framework
- ▶ ☐ TRAIN
- ▶ ☑ Foreign Assistance Framework
- ▶ ☑ **Certification**

Note: Indicators that do not report per activity cannot be selected. Results are linked to activities based on the indicators assigned to activities.
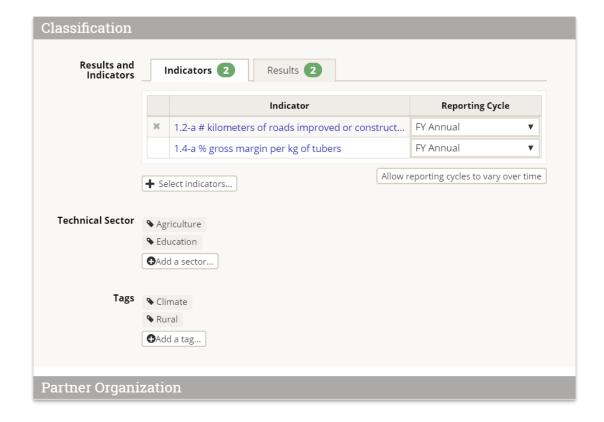

⚙ Master list of indicators   ✔ Save

You can assign all of the indicators under a part of the results framework by clicking on the checkbox next to that technical area, such as *3. Investing in People*, shown in orange.

You can also assign single indicators by only clicking on the checkboxes for those particular indicators, leaving the others clear.

When you've made your selection, click **Save**.

All of the checked indicators are now assigned to this activity.

Classification

Results and Indicators

| Indicators **2** | Results **2** |

	Indicator	Reporting Cycle
✖	1.2-a # kilometers of roads improved or construct...	FY Annual ▼
	1.4-a % gross margin per kg of tubers	FY Annual ▼

＋ Select indicators...

Allow reporting cycles to vary over time
