

Targets

Last Modified on 08/20/2019 4:35 pm EDT

Indicator targets are set on the indicator's **Targets & Data** tab. You can set indicator targets for your whole portfolio globally (across all activities), per activity, or both.

For all targets, we recommend using a date that corresponds to the **End Date** of a Reporting Period for proper visualization display.

Global Targets

To set *global* (formerly 'program') targets for your whole portfolio, make sure the dropdown at the top right is set to **All Activities**.

You will not see this dropdown unless multiple activities report on this indicator.

The screenshot displays the DevResults interface for the indicator "# person hours of training completed in workforce development supported by USG assistance". The "Targets & Data" tab is active, and a dropdown menu is set to "Show results for (All activities)".

Targets

Targets are entered cumulatively.

Date	Global Target	Activity Target	% of Global Target	Activity Actual	Actual % of Activity Target	Actual % of Global Target
30 Sep 2018	80,000		0%	1,393,700	0%	1742%
Click to add...						

Results

Recalculate logic checks

Activity	2018 Q3	2018 Q4	Total
CE-01 Example Activity	669,000	704,700	1,393,700

At the bottom right of the interface, there are buttons for "Delete this indicator" and "Done".

In the first two columns, type in the dates for your targets and the target values.

Activity	2018 Q3	2018 Q4	Total
CE-01 Example Activity	689,000	704,700	1,393,700

When set to the **All Activities** dropdown, there are five calculated columns of information:

- **Activity Target:** The total of the activity targets
- **% of Target:** $[\text{Activity Target}] / [\text{Global Target \#}]$
- **Activity Actual:** The actual result totals from all activities for this indicator. (These cannot be edited here.)
- **Actual % of Target:** $[\text{Activity Actual}] / [\text{Activity Target}]$
- **Actual % of Total Target:** $[\text{Activity Actual}] / [\text{Global Target \#}]$

These columns are not editable and are calculated automatically using the indicator's actuals.

In this view, there are two calculated columns of information:

- **Activity Actual:** The actual result totals from just this activity for this indicator. (These cannot be edited here.)
- **Actual % of Target:** $[\text{Activity Actual}]/[\text{Activity Target \#}]$

Note: Targets can be entered cumulatively (the target value always represents the total

goal up to that date) or incrementally (the target value represents the goal just for the time period since the last target was entered). Select which way you'd like to enter targets on the indicator's **Definition** tab.

Default Reporting Cycle: Quarterly Edit reporting cycles

Unit: Person hours Edit standard units

Periods Results are entered:

- Incrementally (since last result)

Targets are entered:

- Incrementally (since last target)
- Cumulatively (over the life of the project)
