

Assign a Reporting Cycle to an Indicator for an Activity

Last Modified on 03/24/2020 5:48 pm EDT

When an indicator is assigned to an activity, the assignment comes with that indicator's **default reporting cycle**. For example, you might have an indicator that is reported quarterly by most activities (so "quarterly" is the indicator's default reporting cycle). But if any activities need to report the indicator annually, you can set that *per activity*.

This page will show how to change the reporting cycle of an indicator *for a particular activity*.

On the activity overview page, find the **Classification** section. Change the reporting cycle of an indicator with the dropdown menu. This will only change the reporting frequency for that indicator for this activity; it does not affect the indicator's default reporting cycle or any other activities.

The screenshot shows the 'Classification' section of the 'Changing Lives through Technology' activity page. The 'Indicators' tab is selected, showing a table with the following data:

Indicator	Reporting Cycle
F-3.1.1-g-N # pregnant women who slept under an insecticide-t	Quarterly
F-3.1.1-i # houses targeted for spraying with USG funds	Quarterly
F-3.1.2-c # eligible clients who received nutrition or health serv	Annual
F-3.2.2-c # community health and para-social workers who succ	Quarterly
F-3.2.2-d # health care workers who successfully completed an	Quarterly
F-4.1.1-c # learners enrolled in primary schools and/or equivale	Quarterly
F-4.1.3-a-N # USG-funded tertiary education and workforce dev	Quarterly
F-4.1.3-b % graduates from USG-supported tertiary education p	Quarterly

At the bottom right of the table, there is a checkbox labeled 'Allow reporting cycles to vary over time'.

What if an activity reported an indicator annually for a while, and is switching to reporting it quarterly? DevResults lets you vary reporting cycles over time *per indicator, per activity*. To do this, click on **Allow reporting cycles to vary over time**

Classification

Results and Indicators Indicators 8 Results 8

Indicator	Reporting Cycle
F-3.1.1-g-N # pregnant women who slept under an insecticide-t	Quarterly
F-3.1.1-i # houses targeted for spraying with USG funds	Annual
F-3.1.2-c # eligible clients who received nutrition or health servi	Quarterly
F-3.2.2-c # community health and para-social workers who succo	Quarterly
F-3.2.2-d # health care workers who successfully completed an	Quarterly
F-4.1.1-c # learners enrolled in primary schools and/or equivale	Quarterly
F-4.1.3-a-N # USG-funded tertiary education and workforce dev	Quarterly
F-4.1.3-b % graduates from USG-supported tertiary education p	Quarterly

+ Select indicators... Allow reporting cycles to vary over time

A new column appears titled **Date Ranges**. Click **Define** next to the indicator whose reporting cycles should vary.

Classification

Results and Indicators Indicators 8 Results 8

Indicator	Reporting Cycle	Date Ranges
F-3.1.1-g-N # pregnant women who	Quarterly	Define
F-3.1.1-i # houses targeted for spray	Annual	Define
F-3.1.2-c # eligible clients who receiv	Quarterly	Define
F-3.2.2-c # community health and pa	Quarterly	Define
F-3.2.2-d # health care workers who	Quarterly	Define
F-4.1.1-c # learners enrolled in prim	Quarterly	Define
F-4.1.3-a-N # USG-funded tertiary ed	Quarterly	Define
F-4.1.3-b % graduates from USG-sup	Quarterly	Define

In the pop-up window, click **+ Add Reporting Cycle** and choose the new cycle from the dropdown. Add an end date for the cycle no longer in use and a start date for the new cycle. Click **Save**.

Reporting cycles for F-3.1.1-i # houses targeted for spraying with USG funds

Reporting Cycle	Start Date	End Date
Annual	From start of activity	30 Sep 2020
Quarterly	1 Oct 2020	To end of activity

+ Add Reporting Cycle

Now this indicator will be included in the reporting periods of one cycle until the end date for that cycle assignment, then it will be included in the reporting periods of the new cycle into the future.

Note: You can use the same tools on the **Indicator Definition** page to set the reporting cycle per activity for one indicator.
