

# Branding and Customizing Your Site

Last Modified on 05/22/2023 11:51 am EDT

DevResults offers a few options for branding and customizing your site. To make changes to branding and customization, you must be part of a user group that has **View & Edit** privileges for **Program Settings**. Options include:

- **Program Information:** Edit the program name, organization, program description, and planned budget
- **Branding:** Add a custom login message and change the site logo
- **Custom Color Palettes:** Add one or more custom color palettes for indicator visualizations
- **Local Information:** Set your country, currencies, and language options
- Additionally, check out our article on [Renaming Terms in DevResults](#).

To access any of these settings, go to *Administration > Settings*.

The screenshot displays the DevResults dashboard interface. At the top, there is a navigation bar with 'Example Organization' and 'DevResults' on the left, a search bar, and a 'Help' button on the right. Below this is a secondary navigation bar with tabs for 'Data', 'Program Info', 'Tools', 'Administration', and 'Bookmarks'. The 'Administration' menu is open, showing options like 'People', 'Users', 'Groups', 'Organizations', 'Partner Roles', 'Settings' (highlighted in orange), 'Tags', 'Sectors', 'Status Options', 'Notifications', 'API Keys', 'Financial', 'Mechanisms', 'Budget Categories', 'Exchange Rates', and 'Funding Sources'. The main dashboard area contains several widgets: a map of Sierra Leone with activity markers, a 'Program Overview' widget with a line chart titled '1-c # individuals who have received agricultural productivity or foo...' showing data from 2019 Q1 to 2020 Q3, a '46 activities' widget, a '3.1.2-b # HIV-positive people' widget with a stacked bar chart, an 'Activities' list, and a '1.3-d # person-hours of training on land tenure ...' widget with a world map. The footer shows the URL 'https://leslie.devresults.com/en/administration/settings' and an 'Add Tile' button.

DevResults

This section lets you edit your site's:

- **Program name** (larger text in upper left of all pages)
- **Organization** (smaller text in upper left of all pages)
- **Program description**
- **Planned budget** (appears in the program statistic dashboard tile for "lifetime budget")

Click in any of the relevant boxes and edit the text.

**Note:** If you use an internal helpdesk or shared inbox for DevResults or M&E queries, let us know and we can make sure that all DevResults help tickets originating from the app CC that email address well.

## Branding

The screenshot shows the 'Program Settings' page in the DevResults administration interface. The 'Branding' section is highlighted with an orange border. It contains a 'Login Message' text area with the placeholder text 'Message that will be displayed on the login page (optional)'. Below this is a 'Logo' section with instructions: 'For best results, upload a png file with a white or transparent background with solid colors'. There is an 'Upload logo' button and a note: '... or drag and drop your file here'. To the right of the Branding section is the 'Local Information' section, which includes fields for 'Country or Region' (Guinea), 'Country Code' (GN: Guinea), 'Primary Currency' (USD (United States dollar)), and 'Local Currency' (GNF (Guinean franc)). Below these are 'Languages' options with checkboxes for various languages, including French, Spanish, Portuguese, Arabic, Chinese, Russian, German, English (UK), Burmese, Dutch, and Ukrainian. A 'Done' button is visible in the bottom right corner of the page.

This section lets you add a message that will appear to all users on the login page.

You can also upload your organization or program's logo to replace the default DevResults logo in the upper left. This option works best with .png files in grayscale.

To add your logo, click the **Update Logo** button, select the logo image you have, and click OK. The site should update for all users once you've uploaded the file.

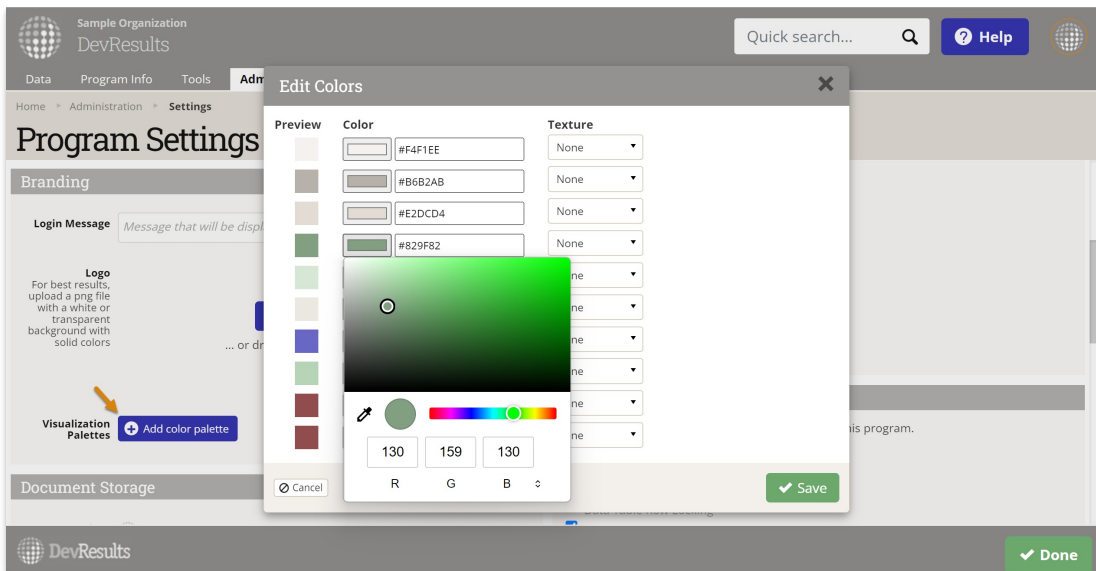

Once you've uploaded a logo, the Update Logo button becomes **Clear Logo**, and you can click this to remove the uploaded file and start over again.

If your logo does not look good after uploading, please [send us the file](#) and we'll work with you to get a more satisfactory image uploaded.

## Custom Color Palettes

If you'd like to add one or more custom color palettes to your DevResults site for your indicator graphs or pie charts, go to **Administration > Program Settings** and, under the **Branding** section, click on **Add color palette**. Use the color pickers and/or enter **hex color codes** directly to choose your color palette, and add optional textures to further differentiate like colors if you wish.

The texture options are: None, lines, tiny dots, woven, waves, crosses, and dots.

Click **Save** to store your color palette preference. You can always edit it later, or add more than one.

The new color palette will appear at the top of all available color options in your graphs and charts.

## Program Settings

### Program Information

Program Name: DevResults

Organization: Example Organization

Web Address: leslie.devresults.com

Program Description: Paragraph-length description of this program (optional).

Planned Budget: 125,000,000

### Branding

Login Message: Message that will be displayed on the login page (optional).

Logo  
For best results, upload a png file with a white or transparent background with solid colors

... or drag and drop your file here

### Local Information

Country or Region: Guinea

Country Code: GN: Guinea

Primary Currency: USD (United States dollar)

Local Currency: GNF (Guinean franc)

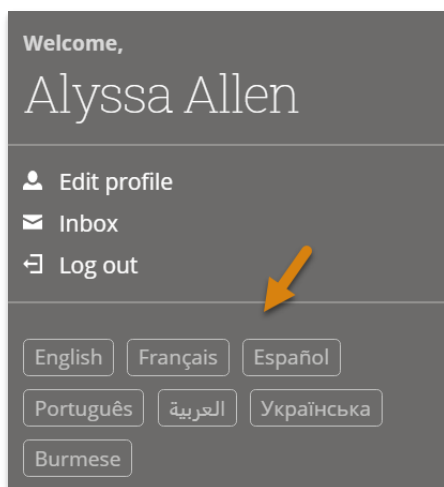

Languages  
Users will be able to choose among these languages for using this system.

Manage Languages

- Français (French)
- Español (Spanish)
- Português (Portuguese)
- العربية (Arabic)
- 中文 (Chinese)
- Русский (Russian)
- Deutsch (German)
- English (UK) (British English)
- Бурмесе (Burmese)
- Nederlands (Dutch)
- Українська (Ukrainian)

This section allows you to change your primary country/country code, the primary/secondary currencies on your site, and the display languages that you allow users to select.

- To edit the **Country or Region**, type in the title you'd like to use. For multi-country instances, we use "World" by default, but you are welcome to edit this to something more fitting.
- The **Country Code** indicates the country you're working in. Leave this blank if you work in more than one country.
- **Primary currency** and **Local currency** are used for **Budget** features and dashboard tiles. To set them, select the appropriate currency from the dropdown menus.
- **Languages**: When other languages are enabled for a site, a user can choose to view DevResults in any of these languages. (Note: only the DevResults system text will be translated, not user-provided content like indicator names or activity descriptions.)
