

IATI: Supported elements

Last Modified on 11/16/2020 9:45 am EST

DevResults supports the export of activity and organization data in XML format according to the IATI Data Standard. Below is a list of the activity and organization elements currently available for export. Supporting additional IATI elements will be an ongoing DevResults initiative. Please reach out to us at help@devresults.com if your organization requires an IATI element not included here. See the [official IATI Standard](#) for more information.

Activity files

The full list of IATI Activity Standard elements, available from [IATI's website](#), is reproduced below. Currently unsupported features are struck through with italics.
