

# Activity Metadata

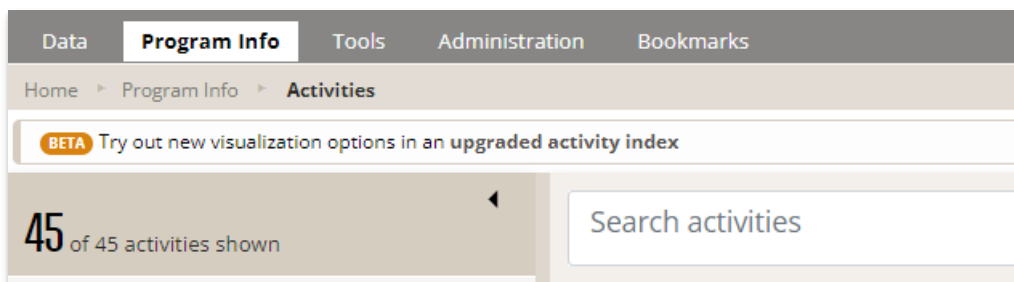

Last Modified on 12/01/2022 11:45 am EST

DevResults has introduced an updated activity index that allows users to visualize metadata for your activity portfolio. These tools let you create matrix reports and pie charts for counts of your activities by geography, status, mechanism, framework, sector, tag, user, organization, and other activity metadata.

To use the updated activity index, navigate to **Program Info > Activities**.

If you're a **beta user**, you will see an option to try out the upgraded activity index above the search option.

Once you click on the option, the index will reload. Click on the list menu on the far right-hand side. You'll be given options to visualize information either in a **matrix** or a **pie chart**.

The **matrix** option will offer a display tool where you can select what fields to add as rows and columns. Once you've selected the relevant disaggregations, you can choose to include or hide totals.

	Department of State	Gates Foundation	US Department of Defense	USAID	Total
Capacity Building	1	1	1	16	19
Children	1	2	1	17	21
Climate	1		1	5	7
Data		1	1	12	14
Gender		1		6	7
Infrastructure				5	5
Rural	1	1	1	19	22
<b>Total</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>36</b>	<b>45</b>

You can also filter the data displayed by using the left-hand side filter selections, or by using the search bar.

sector:"DRG"

	US Department of Defense	USAID	Total
Capacity Building	1	5	6
Children		1	1
Data	1	2	3
Gender		1	1
Infrastructure		1	1
Rural		6	6
<b>Total</b>	<b>1</b>	<b>8</b>	<b>9</b>

Similarly, the pie chart option allows you to display information disaggregated by any of the fields available. You can show or hide the total and change the palette, as you can with any indicator display **pie chart**.
